

BANISHING PAIN

The hectic pace of urban existence is hugely rewarding but it also tends to take its toll on the human body. This largely gets manifested in the forms of neck and back pains. Orthocure at South Point Mall has a cure

Orthocure, located at South Point Mall, aims to bring out a change in the way orthopaedic problems can be treated by avoiding the use of drugs and surgery.

Back and neck pains are the most frequent yet the most ignored problem that we face from time to time. Our usual response to

both these problems remain medicines or surgery for long time solutions. Orthocure, an initiative by Sunil Baijal was started as he believed that a lot was missing in the area of healthcare specially when it came to orthopaedic complications. As surgeries and medicines dominated the treatment of back and neck pain, the services at Orthocure provide you with long term solutions through machines and other protocols with minimal

use of drugs.

The clinic offers everything under one roof from doctors from top class hospitals to physiotherapists along with highly technical machines for treatment. The machines used at Orthocure have been successfully used in US, Canada and Europe with hundreds of people being cured with it. The Special Decompression Machine has been developed

ORTHOCURE WAS STARTED BECAUSE THERE WAS A LOT THAT SEEMED TO BE MISSING IN THE AREA OF HEALTHCARE

in Canada and is used specially for the problem of slip disk which a lot of working population faces on a daily basis.

MedX which had been quite successful in the US for about 15-20 years now, is used extensively for chronic and neck pain. The advantage that Orthocure carries with it is the fact, that it is located within the periphery of DLF5 making it easier for the residents to come with their problems rather than rushing

to a top class hospital and waiting for long hours. Secondly, since surgery is avoided, the treatment becomes available at a reasonable price. Also, the place does not totally rule out traditional physiotherapy. It is combined with new age technology for better results.

So the next time, you feel that there is a potential neck or back pain, do not rush to the hospital OPD, just contact Orthocure, your all in one solution to orthopaedic pains. **DLF5**
